

KEGRIVER

Keg River Ice Melters

NORTH COUNTRY

Traction Grit – for instant traction!

- Contains Limestone Traction Grit to provide instant traction in icy conditions, at all temperatures. Larger granule sizes than sand to reduce tracking.

Contains Calcium Chloride – effective to -23°C

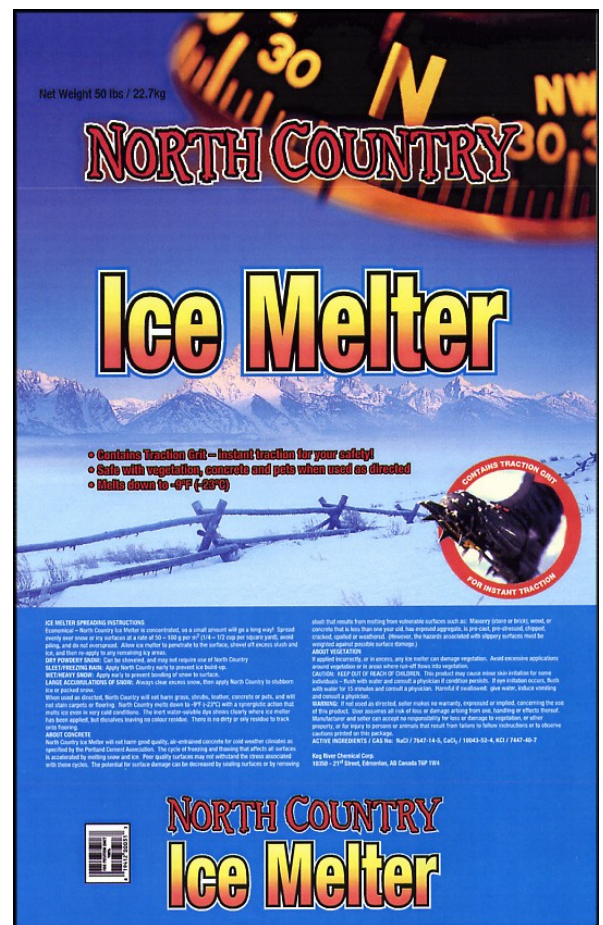

- Calcium Chloride is the most effective Ice Melter and it works synergistically with other ingredients for enhanced melting power.
- Calcium Chloride is used as a fertilizer, a food additive, and by highways departments for de-icing and dust control– a safe and proven ingredient.

Green soluble marker

- Dye shows where product is applied and reduces over-application.
- Dye is applied using a Calcium Chloride Brine carrier – Calcium Chloride coats each granule to improve effectiveness of the overall blend – a technique used by highways departments to improve the performance of road salt.

Safe to use Ice Melter

- North Country will not harm vegetation, properly air-entrained concrete or pets when used as directed. Beware of manufacturers who claim complete safety to plants. Any Ice Melter can harm plants with over application.

22.68 kg (50 lb) Bag
